conference that features general and industry-focused presentations on blockchain designers and developers, and fellow EEA members. Teams will present on the EEA and Conor Svensson, EEA Technical Standards Working Group Chair, will share his insight on how EEA's blockchain standards, certification program, and Special Interest Groups (SIGs) can help drive innovation in the blockchain and cryptocurrency space.

An all-day hackathon will be held at the EEA’s 2018 Annual Conference. Teams of up to 4 members from anywhere in the world can register to participate in the hackathon and contribute towards the EEA’s blockchain standards. The EEA is also excited to welcome PegaSys as a new member for 2018 and partner with their companies to host a sponsored evening get-together.

The EEA had a very successful panel presentation at the 2018 Concordia Annual Summit, one of the largest and most inclusive non-partisan forums alongside the United Nations. The EEA presented on topics such as the role of blockchain in financial services, the execution of international payments, and privacy. The EEA also had a successful panel presentation at the 2018 Consensus Blockchain Conference. The EEA presented on topics such as the role of blockchain in financial services, the execution of international payments, and privacy.
