Enterprise blockchain environments worldwide. They spoke on creating real-world, interoperable applications for the evolving blockchain ecosystem! EEA Technical Program Director Chaals Nevile and Corporate Secretary Oksana Davis participated in a panel discussion at the EEA's booth.

The EEA has been busy attending and speaking at several events and conferences. EEA Director Ron Resnick and EEA Board Member Ryan Van Buskirk will be speaking about demystifying tokens and the standardization of digital assets.

Collaboration site for developers from around the world will meet in Redmond, WA for BuildETH, a one-day event for those interested in building and development to issues such as real-world usability, layer 2 solutions for security and privacy, and other key topics.

Learn about the Token Taxonomy Initiative and Read the EEA's recent white papers. The Token Taxonomy Initiative is a collaborative effort seeking to define and standardize the terminology around tokens and blockchain.

For more information, visit the Enterprise Ethereum Alliance website. The EEA connects Fortune 500 enterprises, startups, academics, and technology vendors with Ethereum subject matter experts. We have hundreds of members located in 45 countries.

The EEA connects Fortune 500 enterprises, startups, academics, and technology vendors with Ethereum subject matter experts. We have hundreds of members located in 45 countries.

The EEA is authorized by a license granted by the Ethereum Foundation. The license to use does not require attribution.

EEA members are contributors to the Ethereum protocol, which provides the secure, open public blockchain on which the EEA applications are built. EEA members contribute to the development of the Ethereum protocol through code contributions and participation in the technical governance of the protocol. EEA members also contribute to the development of Ethereum-based applications, and engage in the ongoing development of the EEA's Technical and Standards Working Groups.

The EEA's Technical Working Groups focus on developing technical standards and specifications for Ethereum-based applications. The EEA's Standards Working Group is responsible for developing technical standards and specifications for Ethereum-based applications, and engages in ongoing development of the EEA's Technical and Standards Working Groups.

EEA members are volunteers who are committed to the success of the EEA and the future of the Ethereum protocol. EEA members are free to participate in any aspect of EEA activities, and are not required to participate in any specific aspect of EEA activities. EEA members are not required to contribute to the EEA in any specific way, and are not required to meet any specific criteria to participate in EEA activities.
