APRIL HIGHLIGHTS 2020

Enterprise-Ready Blockchain Solutions Development Never Stops

There's no doubt COVID-19 has brought about some degree of extraordinary change to our daily lives. Despite the peculiar circumstances, our Ethereum community continues to innovate and thrive, and our growing global community of leaders, innovators, and developers continue to collaborate to create enterprise-ready blockchain solutions. If you currently find yourself in some form of slowdown from your normally hectic and busy daily life, this may be a good time to join the EEA community and share your expertise.

- **Gain industry recognition through participating in an EEA Working Group or Special Interest Group.** Our [Technical Working Groups and Special Interest Groups](#) (SIG) continue to “virtually” meet and collaborate on developing valuable resources for our members.
- **Get your entire organization involved!** There is no limit to the number of individuals within your organization who can participate in EEA activities. Your team could contribute to the development of best use cases and technical specifications that benchmark EEA as a world-class standards development organization.
- **We are always looking for presenters!** If you have insights you'd like to share, we are always looking for EEA members to give presentations on application patterns, use cases, and other enterprise-related topics. If your topic has widespread industry appeal, we can promote the presentation to a wider audience, as part of monthly public EEA Education Series.
- **There are open chair and co-chair seats to fill.** At this very moment, there are chair, vice-chair, and co-chair positions open in several groups. If you have a passion for a topic covered by an EEA SIG or have ideas for forming a new SIG on a topic that's not currently covered, now is the time to join!
- **The EEA is always happy to amplify your stories.** The EEA has a very large following on social media, and we are happy to share our members' enterprise Ethereum stories. We'll promote your applicable projects, blogs, or upcoming webinars, and utilize our [monthly newsletter](#) to promote any news that covers you and your projects!

As a member-led organization, our goal is to drive the use of Ethereum blockchain technology as an open standard to empower all enterprises. We connect Fortune 500 enterprises, startups, academics, and technology vendors with Ethereum subject matter experts. Learn more about what the EEA has been up to, and why now is the perfect time to [join!](#)

EEA Task Force Survey of Enterprise Applications for Ethereum Mainnet

The EEA Enterprise Use Cases and Requirements Task Force (TF) continues to conduct an external survey of enterprises to find new applications and use cases; prioritize them based on their feasibility, impact, and ROI; and drill into specific functional and nonfunctional requirements. The information gathered by this TF is expected to help other task forces within the EEA Mainnet Working Group to refine their strategies.

The Mainnet WG formed this TF to explore and document some of the most relevant use cases involving enterprise applications on Ethereum Mainnet, and identify requirements that can be shared with the community and used as a starting point for designing and building technical solutions to fill any existing functional gaps. You can learn more by clicking [here](#).

EEA April Education Series Webinar

Konstantin Kladko from SKALE Labs discussed the various approaches to rollups -- including optimistic, ZK, and BLS -- how they work, and their pros and cons. If you were unable to attend or want to hear the session again, the recording is available on the [EEA website](#).

[View Recording](#)

EEA members also have access to many other regularly scheduled presentations and webinars on a number of industry specific topics. Learn more about this and other benefits of EEA membership [here](#).

Upcoming Events

Ethereal Summit Goes Virtual!

May 7-8, 2020

Registrants will get exclusive access to virtual keynotes, fireside chats, AMAs, and virtual meet-ups with some of the leading builders and thinkers in Web3. Speakers include Taylor Monahan of MyCrypto, Ayesha Kiani of LedgerPrime, Dave Sandor of Allinfra, Omri Ross of eToro, Jinglan Wang of Optimism, and Vitalik Buterin. EEA board members Aya Miyaguchi (Ethereum Foundation) and Yorke Rhodes III (Microsoft), as well as EEA Mainnet Working Group Vice-Chair John Wolpert (ConsenSys), will also be speaking at the event! Reserve your free spot today.
