

There is Still Time to Register for Ethereum in the Enterprise – Asia Pacific 2020

December 3-4, 2020
9:00 AM – 2:30 PM JST (UTC+9)

Beijing 8AM | Singapore 8AM | Tokyo 9AM | Los Angeles 4PM (Wed, Dec 2) | New York 7PM (Dec 2)

The EEA Asia Pacific Online Conference is happening this week, and there is still time to join us as we showcase the vital Ethereum community work, development, and innovation ongoing in Asia Pacific. Registration is free!

Content will cover everything from the state of Ethereum adoption in the enterprise to the burgeoning Ethereum development in the Asia Pacific region.

[Register Now](#)

Our talented set of speakers will provide their real-world experience building enterprise solutions using blockchain technologies and decentralized strategies. Get excited for...

- A Conversation with SEC Commissioner **Hester Peirce**
- A Fireside Chat with ConsenSys Founder **Joseph Lubin**
- A Dive into the Ecosystem with Ethereum Foundation's **Aya Miyaguchi**

And sessions from....

- **Kevin Owocki** - Founder, Gitcoin
- **John Whelan** - MD of Digital Innovation, Santander
- **Paul Brody** - Global Blockchain Leader, EY
- **Jack Lu** - Founder & CEO, Wanchain
- **John Wolpert** - Group Executive, ConsenSys
- **Yorke Rhodes III** - Cofounder of Blockchain, Microsoft
- **Jim Zhang** - Founder, Kaleido

And so many more!

EEA Launches New EthTrust Security Levels Working Group

The EEA recently announced the formation of the EEA EthTrust Security Levels Working Group ([learn more here](#)) whose mission will be to continue the advances begun by the Ethereum Trust Alliance (ETA), now part of the EEA, on the EthTrust project, that will set standards for secure, smart contract transactions that are conducted within the Ethereum ecosystem. Given that it only takes one small flaw in smart contract code to instantly lock up or lose tens of millions of dollars, the EthTrust project's standard and registry aim to make it quick and easy for organizations and individuals to tell if a smart contract has been through a full security audit by a professional team.

EthTrust Security Levels Working Group Chair Tom Lindeman will talk about the EthTrust project at the Ethereum in the Enterprise - Asia Pacific 2020 virtual event session led by EthTrust Security Levels Working Group Chair Tom Lindeman! [Register for free now.](#)

Learn about this working group and how you can get involved at the EthTrust Security Levels webinar on December 15, 2020 at 4 PM Eastern. [Register here.](#)

Noteworthy Technical Updates

Our Working Groups are moving along, with some new work starting up as well as continuing important core work!

- **The Specifications Working Group** has released [version 6 of the Enterprise Ethereum Client Specification](#), and [version 2 of the Enterprise Ethereum Permissioned Blockchains Specification](#).
- **The Crosschain Interoperability Working Group** is putting together an EIP to define how to identify a blockchain - an activity that is central to their work.
- **The EthTrust Security Levels Working Group** has started working in its initial repository on a specific draft. The first formal meeting of the group will take place on December 2, with a webinar introducing what has been done so far and where the group is going on December 15 to provide a bit more detail. (*See earlier article.*)
- **The Interoperability Testing Working Group** has distributed a new charter, and is building new testnets available for members to connect to for testing products and services.

The technical work proceeds most effectively when there are a diverse set of stakeholders providing feedback. So, whether you represent a blockchain client developer, a customer wanting a client to run in a consortium, or a software integrator providing tailored solutions or other tools, your input can influence the work and ensure that it meets our goal of solving real problems for real enterprises, large and small. We strongly encourage your team to [join the EEA](#) and get involved in our technical work and collaborate with the brightest minds in the blockchain industry!

Recent Events

The EEA was proud to support the 2020 Baseline Protocol Summit, a multi-session technical working conference focused on furthering the technical implementation of the Baseline Protocol, while providing those new to the community with an update on the latest developments.

The EEA was excited to join the ConsenSys Product Roadshow on November 17-19. EEA Executive Director Daniel Burnett and ConsenSys Founder Joseph Lubin hosted a Fireside Chat, where they celebrated the wins of Web3 and discussed how to pave the way for public mainnet.

The EEA November Education Series took place on November 18, 2020. Konstantin Richter of Blockdaemon explored what it takes to operate nodes for blockchain networks as well as detail the improvements that the Proof of Stake consensus model will bring to Ethereum and Layer 2 networks. Upcoming Events

EEA Webinar: Trust Security Levels

December 15, 2020 at 4:00 PM ET

EthTrust is a new system and standard designed to help individuals or enterprises interacting with Ethereum smart contracts gain a level of trust in the security of these contracts ahead of time.

Join the new EEA EthTrust Security Levels Working Group Chairs, Tom Lindeman of ConsenSys and Pierre-Alain Mouy of NVISO Security, to learn why we created EthTrust, where we are today, and how you can get involved moving forward to help truly make Ethereum a trusted transaction layer for Web 3.

EEA Education Series: An Introduction to Layer 2 Solutions for Ethereum Scaling + A Tech Encore

December 9, 2020, 12:30 - 2:30 PM ET

Join Tas Dienes from the Ethereum Foundation as he takes us on an exploratory journey into the world of Layer 2 scaling solutions for Ethereum. He will define what Layer 2 is, discuss the problems it solves, and put Layer 2 in context with ETH2. He'll also discuss timelines and maturities, the different types of Layer 2 solutions, as well as barriers and challenges for enterprises building on Mainnet.

Then stick around after the presentation for an encore technical session from speakers from several promising L2 projects!

BlockApps Launches Agribusiness Blockchain Network

'TraceHarvest'

BlockApps, the leading enterprise blockchain platform provider, recently announced the launch of the TraceHarvest Network, which is transforming the way agricultural products are managed. The new blockchain-powered business network was developed in collaboration with Bayer, the leading technology innovator in the agriculture industry, and will set new standards in sustainability, driving digital transformation and food system resiliency that will shape the future of the agriculture industry. Galileo Platforms Announces a Global First for the Insurance Sector

Galileo Platforms has become the first company to have its advanced blockchain platform used by an insurer as its core policy administration system. Galileo's blockchain technology enables new business quotes, pricing, digital policy issuance, commissions and claims to be completed in real-time with a single, secure "source of truth" agreed by all parties. British Blockchain Association Publishes 6th Issue of JBBA

We are delighted to announce that the 6th issue of the Journal of the British Blockchain Association (The JBBA) has been published! Now into its third volume, the Journal continues to publish important path-breaking research. [Learn more here.](#)

Newest Members

The EEA connects Fortune 500 enterprises, startups, academics, and technology vendors with Ethereum subject matter experts. We have hundreds of members located in 45 countries.

We recently welcomed the following new EEA members:

- [NVISO GmbH](#), experts in cyber security providing services to help prevent, detect and respond to cyber attacks.
- [Quantstamp](#), a trusted leader in blockchain security, delivering end-to-end blockchain solutions for the world's largest enterprises.
- [Taurus Group SA](#), the leader in secure, most compliant and reliable infrastructure and tools for digital assets.

Become a Member

The EEA enables organizations to adopt and use Ethereum technology in their daily business operations. We empower the Ethereum ecosystem to develop new business opportunities, drive industry adoption, and learn and collaborate with one another. Our global community of members is made up of leaders, adopters, innovators, developers, and businesses that collaborate to create an open, decentralized web for the benefit of everyone. Join us and contribute to our work!
