

Ethereum in the Enterprise 2021 Recordings and Presentations Available on YouTube!

Thanks again to those who joined the EEA community at our recent virtual event. With over 1,700 registrants, we could not have been more proud of the turnout. Our talented line-up of speakers filled the afternoon with excellent discussions surrounding Ethereum adoption, real-world use cases, and technical innovations.

If you were unable to join us, or want to relive your favorite sessions, we've got you covered! All sessions from the event are available to watch now.

EEA Launches New Eth2 Interest Group

The EEA is pleased to announce the launch of the new Ethereum 2 (Eth2) Interest Group. Ethereum 2 is the new big upgrade to the Ethereum network, promising improvements in speed, efficiency, security, and scalability. The EEA Eth2 Interest Group is the forum to discuss the benefits of Eth2 features and how they impact the enterprise world.

The group met for the first time this month. Consider [becoming a member of the EEA](#) and joining the group to discuss the questions about Eth2 that are important to you.

Talk to IT Experts at EEA Mainnet Office Hours

Do you want the benefits of intercompany business automation without the huge costs and technical complexities in your environments?

Do you want to reduce error rates in the business all around while reducing your system TCO?

Do you have a project at your company where you think the Ethereum mainnet could be usefully applied, but you're concerned about how to approach it and how to make the case for it?

Our team of top industry IT experts can help determine how to get started and the right approach and solutions to use for the job at hand. Our network of senior executives can help give you the aircover you need to make a strong case with both leadership and engineering on the right use of public blockchain to achieve your cost reduction and revenue goals.

Register now for one or both of these sessions:

- **June 30 5:00 pm PT / 8:00 pm ET / July 1 09:00 JST (APAC friendly)**
- **July 1 9:00 am PT / 12:00 pm ET / 18:00 CET (US/EU friendly)**

Reminder: Take the Blockchain Talent Survey

EEA has teamed up with the [Blockchain Education Network \(BEN\)](#) to co-host a Blockchain Talent Survey and Report aimed to help the industry understand the demand for talent and the gaps in blockchain education. BEN is a global non-profit network of universities, professors, and blockchain clubs that want to understand enterprise needs for blockchain talent so they can teach the next generation of leaders in the industry the appropriate skills.

The deadline for responses is June 30, 2021. Your organization can contribute to this survey at the link below. It should only take 10-15 minutes, and you will get free access to the Blockchain Talent Report that will be created after, along with free exclusive access to BEN's massive pool of future talent for hire.

Technical Working Group Updates

Based on requests and discussions among the EEA Member Council, the Board has recently approved two new Interest Groups.

- The new **EEA Tokenization Interest Group**, which will help many members come to grips with issues and common needs around tokens and how to use them effectively.
- **The Ethereum 2 for Enterprise Interest Group**, which set some initial directions and goals for work over the next few months to a year during its kick-off meeting. We look forward to discussions on how the "major" evolution of the protocol impacts Enterprise use cases and technology requirements.

These two Interest Groups join the **Financial Services Interest Group** and the **Supply Chain Interest Group**, who continue to work on exploring important issues in their respective areas and how Ethereum, in general, is changing the landscape - providing opportunities and challenges.

The Core Specifications Working Group continues to develop requirements for interoperability of tools operating Enterprise Ethereum blockchains.

The Testnet Group is defining mechanisms to allow automating tests for specification conformance, and running tests as experiments.

The EthTrust Security Levels Working Group is determining the best way to improve the quality and reliability of security reviews across the industry.

Good standards are developed through collaboration between competitive implementers and their customers to ensure that we are solving real problems. Becoming a member of the EEA would grant your organization's employees access to our collaboration site and the opportunity to join our various technical groups. Upcoming Events

EEA Supply Chain IG Clubhouse

SAVE THE DATE: June 30, 2021

The Supply Chain Interest Group (IG) is announcing its first Clubhouse speaking event in 2021! Join us on June 30 at 1:00 PM ET and listen to some of the most pressing issues relating to supply chain metadata standards within blockchain.

A number of subject matter experts will address where blockchain is lacking standards, and where standards can be applied to unlock new value. We aim to usher in a new era of participants who are passionate about the impact of implementing these future standards to blockchain use cases. The initial output of this event will yield a report and ultimately a new starting point for the Supply Chain IG.

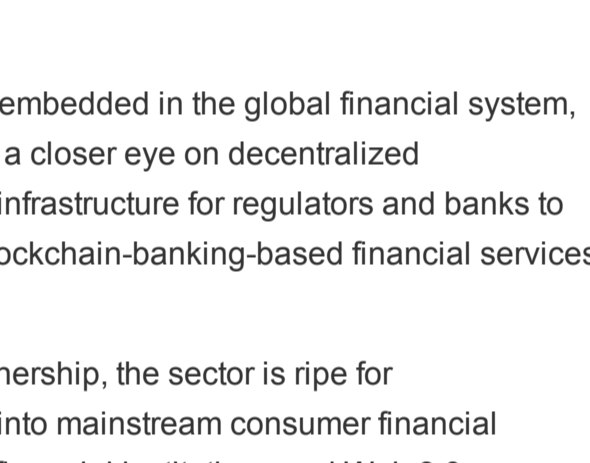

Join the future monthly Supply Chain IG meetings to further develop the initial report and to help chart the group's initiative.

Mark your calendar and stay tuned for more details!

Hyperledger Global Forum 2021

June 8 - June 10, 2021

We are proud to be a community partner of the 2021 Hyperledger Global -- the place for users and contributors of Hyperledger projects from across the globe to connect, network and collaborate virtually. Learn and understand various aspects of the ecosystem, including technical roadmaps and milestones of both Hyperledger specific projects and the latest uses and applications of other related technologies across industries and markets.

Social networking for the community to bond, and hacking activities will also be front and center at this annual event.

EEA June Education Series: The Emergence of Open Banking in Web 3.0

June 9, 2021

With cryptocurrencies becoming increasingly embedded in the global financial system, government authorities are beginning to keep a closer eye on decentralized solutions. Until now, there has been a lack of infrastructure for regulators and banks to test the proper framework for a harmonious blockchain-banking-based financial services industry.

Thanks to the API3 & Open Bank Project partnership, the sector is ripe for standardization and ready to be incorporated into mainstream consumer financial technologies, which can be powered by both financial institutions and Web 3.0.

Join the Open Bank Project and API3 to find out how traditional finance and the blockchain will converge to create a new generation of blockchain banking-based offerings.

EEA June London Meetup

June 30, 2021

This meetup is for anyone interested in or using Ethereum blockchain technology in the enterprise. It doesn't matter if you're a startup, global enterprise, or open source hacker - we all share the common goal of seeing an Enterprise-grade blockchain platform based on Ethereum!

Register now to hear from Julio Faura of Adhara and Dr. Weijia Zhang, EEA Regional Head, China, and vice president of engineering at Wanchain Foundation. There will be opportunities for networking during the event. We hope to see you there!

Recent Events

EEA members and invited guests got together on May 20 for a definitional workshop on DeFi. This interactive virtual session drew input from attendees on the current issues that need to be addressed for DeFi to really flourish. Together, we explored what the ideal world looks like for DeFi years from now. Thank you to everyone who joined us!

During this month's virtual EEA London Meetup, John Whelan of Banco Santander shared some of the work that his team have been doing in the field of digital securities.

You can listen to his presentation [here](#). Dr. Naseem Naqvi of the British Blockchain Association also discussed Enterprise blockchain research and "getting it right the first time." You can listen to his presentation [here](#).

The Machine Consultancy LLC - Ethereum Network Crawler and Ethereum Virtual Machine

The Machine Consultancy LLC has been working to build an Ethereum Network Crawler using Apache Tuweni networking libraries in Kotlin using coroutines. [Learn more here.](#)

They have also been working with Apache Tuweni to implement the Ethereum Virtual Machine. [Learn more here.](#)

The Journal of The British Blockchain Association

The British Blockchain Association has published the 7th issue of the *Journal of The British Blockchain Association* (JBBA) with the theme, "Enterprise Blockchains." Print copies of the journal were sent to policymakers, regulators, fin-tech corporations, all major banks, the world's leading universities, DLT research hubs and think-tanks, and members and partners of the BBA in 107+ countries around the globe. The JBBA is the world's first fully open access, peer reviewed, scientific blockchain research journal available in print and online. [Learn more here.](#)

CargoX announces the Platform for Blockchain Document Transfer (BDT) #BultonEthereum and #PoweredbyPolygon

The CargoX Platform helps companies build trust in a trustless environment for the logistics, manufacturing, finance, trading, energy, and services industries.

The Egyptian Customs Authorities will demand all importers into Egypt to use the CargoX platform for providing Advance Cargo Information (ACI) to Egyptian documents up-front, before shipping into Egypt, after July 1, 2021. CargoX, along with Polygon's highly scalable blockchain solution, has the power to transform the international shipping business by bringing more transparency and decentralization to the logistics, manufacturing, finance, trading, energy, and services industries. Become a Member

The EEA enables organizations to adopt and use Ethereum technology in their daily business operations. We empower the Ethereum ecosystem to develop new business opportunities, drive industry adoption, and learn and collaborate with one another. Our global community of members is made up of leaders, adopters, innovators, developers, and businesses that collaborate to create an open, decentralized web for the benefit of everyone. Join us and contribute to our work!
