

## Ethereum Anniversary Special Event Recordings Now Available!

Thank you to those who were able to join us last month in celebrating six years of Ethereum! We hope you enjoyed our virtual event to highlight Ethereum's emergence as a driving force for innovation in business and commerce.

If you were unable to attend or want to hear the presentations again, the recordings are now available. You will hear industry leaders discussing why Ethereum has become the fastest growing and most trusted blockchain network and how it will drive the next cycle of business and technical innovation! Click below to see the agenda with a link to each presentation.

## Upcoming Events

### Trusted Compute Office Hours Series #1: Hardware vs. Software-Based Trusted Compute Approaches

September 7, 2021

The EEA Trusted Compute Working Group is hosting a series of open office hours to educate the EEA community about how to use trusted compute with blockchains (and public blockchains in particular) to further adoption. You will gain advice and resources from subject matter experts to help you overcome the implementation and adoption challenges of trusted compute projects.

### EEA Education Series: A Manual for Ethereum Network Operations for Public/Private Networks

September 8, 2021

During this webinar, **Antoine Toulme** from **Machine.io** and **Splunk** will discuss how to set up and monitor your Ethereum infrastructure to prevent downtime. He will review the latest best practices for redundancy and security, and cover secret management, key management, network security, and upgrade policies. He will also demonstrate several approaches for private networks using private enclaves versus public, non-permissioned networks.

## Recent Events

### August EEA London Virtual Meetup

This virtual EEA London Meetup, hosted by Conor Svensson of Web3 Labs, featured a fireside chat and Q+A session with **Joseph Lubin, CEO and founder of ConsenSys**, and a presentation by **Sunil Jose, Director of Product at AlphaWallet and Project Manager at Alchemy NFT** about NFT manipulation, ticketing, and token distribution.

### EEA August Education Series: Deep Dive into EEA Community Projects

At this recent EEA Education Series event, **EEA Executive Director Dan Burnett** and **OASIS Executive Director Guy Martin** discussed the motivations behind the EEA Community Projects partnership, the advantages for both organizations, and the positive impact they expect on the Ethereum industry as a result. [Hear the recording.](#)

## Interest Group & Working Group Updates

Although the summer holidays offered some people a break, many of our groups are using this time to plan and prepare for a burst of work! Here is a glimpse of what they have been up to.

### Interest Group Updates

The **DeFi Interest Group** has recently launched with new chairs: John Ho, Niko Casagrande and Ajit Tripathi. During their first meeting, they set the scene for an ongoing schedule of work and discussion on topics of interest.

The **Eth2 Interest Group** has been testing a new calendaring system that they are looking to roll out across groups as an administrative improvement.

The **Tokenization Interest Group** will shortly be surveying EEA members on issues related to tokenization as part of their work plan.

### Technical Working Group Updates

The **EthTrust Security Levels Working Group** has a new chair, Chris Cordi, a security expert with Splunk. We are confident that with his help the group's work will continue to accelerate.

The newly rechartered **Trusted Execution Working Group** has been planning their webinar series, and the first Office Hours session about hardware and software for secured computing is scheduled for September 7.

The **Core Specifications and Crosschain Interoperability Working Groups** have been working quietly through the month, and the NIST Authority to Operate Working Group will be starting its working schedule this month.

The **Testing Working Group** continues to work on faster, simpler approaches to setting up Enterprise Ethereum blockchains for testing purposes, as well as defining conformance testing for other EEA specifications.

**Join the EEA to participate in these activities.** Good standards are developed through collaboration between competitive implementers and their customers to ensure that we are solving real problems. Becoming a member of the EEA would grant your organization's employees access to our collaboration site and the opportunity to join our various technical groups. [Learn more about EEA membership here.](#)

## Member News

### BlockApps and Genesis – Blockchain for Beef Bring Transparency to Meat Supply Chain

Genesis – Blockchain for Beef leverages BlockApps' TraceHarvest Network blockchain platform to improve visibility into the health and story of animal products, from farm to table. [Read more.](#)

### Gaming Social Network Fruitlab selects Aventus Network's Blockchain Technology to Process Fruitlab Tokens - PIPs

Aventus Network, a layer-2 blockchain protocol that brings scalability, speed and lower costs to Ethereum transactions, has partnered with fruitlab, the innovative social network of gamers, to enable creators and community members to earn revenue and compete for value. [Read more.](#)

### Member Spotlight: BSOS

As an EEA member, [BSOS](#) is part of the EEA community of organizations working to advance Ethereum and drive industry adoption. In the Q&A below, the EEA interviewed CEO and Co-founder Daniel Huang about how BSOS is contributing to the ecosystem to help Ethereum reach its full potential. [Read more.](#)

### Welcome to Our Newest Member

The EEA welcomes new EEA member [zkTube](#), a Layer 2 protocol which uses Zero-Knowledge proof and ZK-Rollup to realize low transaction fees and high throughput transaction's in ETH.

### Become a Member

The EEA enables organizations to adopt and use Ethereum technology in their daily business operations. We empower the Ethereum ecosystem to develop new business opportunities, drive industry adoption, and learn and collaborate with one another. Our global community of members is made up of leaders, adopters, innovators, developers, and businesses that collaborate to create an open, decentralized web for the benefit of everyone. Join us and contribute to our work!
