

## Ethereum Turned 7 and Here's How We Celebrated

Thank you to those who joined the EEA Ethereum 7th Anniversary Special event last Thursday. It was a great opportunity to look back and see how far Ethereum has come and to get excited for the innovations that lie ahead. We are grateful to the Ethereum and blockchain leaders who participated in our panel discussions and presentations, as well as the special guests who shared their Ethereum stories. If you missed it, you can view the event [here](#) – and also catch the stories of special guests on our [LinkedIn](#) and [Twitter](#) social channels.

## ICYMI: Check Out the EEA Ethereum Business Readiness Report 2022

Last month, the EEA announced its **Ethereum Business Readiness Report 2022**.

This report is designed to help the broader business community better understand Ethereum's capabilities and potential to solve business problems. Based on extensive qualitative and quantitative research and interviews, it provides a complete and independent snapshot of where business Ethereum is today. Download the report below.

## Have You Checked Out Our EEA Primers Yet?

We're excited to share that our EEA Primers series is growing! Check out our latest entries on Stablecoins and Proof of Stake, the most recent additions to our library.

We're working hard to arm businesses with the information, training, and support they need to enter the Ethereum space and elevate their organizations, and we believe this primer series is an important part of that effort. Designed specifically for those new to the Ethereum ecosystem, each primer offers an introduction to an important Ethereum and blockchain concept, to help get more professionals started on the platform.

Check out the library now and stay tuned for more content coming each month! Have a topic suggestion for a future primer? Email us at [primers@entethalliance.org](mailto:primers@entethalliance.org).

## Upcoming Events

### EEA Education Series:

#### Top Ten Security Considerations for Blockchains and Smart Contracts

Wednesday, August 10, 2022, 12:30pm ET

At our August Monthly Education webinar, **Dr. Weijia Zhang** of Wanchain will provide an in-depth rundown of the top security considerations for blockchains and smart contracts. He'll discuss common security vulnerabilities in smart contracts and best practices for writing and deploying smart contracts. Save your spot below.

### EEA Tokenization Interest Group Call

#### Token Economics Framework

Tuesday, August 30, 2022, 10:00am ET

The EEA's Tokenization Webinar Series is gearing up for its third session, and we invite you to join us on **August 30**. EEA Tokenization Interest Group Co-Chairs **Daniel Norkin**, co-founder of Envision Blockchain, and **Benjamin Bukari**, CEO of Abbac Inc., will lead a discussion on the Token Economics Framework. We hope to see you there!

## Recent Events

**EEA Tokenization Interest Group Call - Digital Asset Tokenization: Technical Framework and Considerations:** During this presentation, **Daniel Norkin**, co-chair of the EEA tokenization IG and co-founder of Envision Blockchain, discussed the technical frameworks and business rule considerations with tokens. [Access the recording.](#)

If you missed the first Tokenization Webinar in June, you can [access the recording here](#) and [read the key takeaways](#) from the presentation.

**EEA Monthly Education Series - Blockchain and Cryptocurrency Regulatory Efforts at the US State Level:** **Gabriella Kusz**, CEO of the Global Digital Asset and Cryptocurrency Association, and **John Whelan**, Managing Director - Crypto & Digital Assets, Banco Santander, and EEA Board Chair, discussed the status and nature of regulatory efforts as well as the current views on adopting blockchain and cryptocurrency within agencies and other state-based operations. [Access the recording.](#)

## Interest Group & Working Group Updates

### Working and Interest Group Updates

- The **Ethereum Training Quality and Crosschain Interoperability Working Groups:** The Crosschain group is connecting more broadly across the community to share their specification work and review the requirements and existing approaches of the market, while the ETHTQ group is determining which skills and knowledge Ethereum Training must provide to ensure trainees can participate in the Ethereum industry.
- The **Core Specifications Working Group** has finished its charter and will publish the QBFT Consensus Protocol they have developed. The group's other work will remain available for people who are interested in developing them, while EEA Members consider the best next steps in this area.
- The EEA's newest working group **DeFi Risk Management and Accounting (DRAMA) Working Group**, will have its first meeting on August 4. The group grew out of discussions in the Defi Interest Group and will focus on addressing the lack of best practices in assessing Defi risk in accounting. Co-chairs Dyma Budorin of Hacken, and Michael Gonzales of EY, are working to ensure the group has a concrete focus, and look forward to closing the gap that Enterprise faces today.
- The **Testnet Working Group** is running and can now set up specific transactions to enable precise testing of the state before and after a specified set has been added to a block.
- The **Authority to Operate Working Group** is looking at the possible options and the scope of the market for Ethereum-based work that needs to gain NIST Authority to Operate, for example, to provide services to US government authorities.
- The **EthTrust Security Levels Working Group** is close to finalizing the first version of the EEA EthTrust Security Levels Specification, a set of standards to ensure that smart contract security audits cover the various vulnerabilities identified by the leading industry stakeholders who have participated in developing this specification. This represents an important first step in underpinning the security of EVM-based blockchains running smart contracts with standards that provide for real quality assurance, and thus build trust in the ecosystem as a platform of choice.
- The **Tokenization Interest Group** continues to develop public webinars and analyze members' real-world use cases and share their expertise within the group.
- The **DeFi Interest Group** is running a series of discussions among the members on topics of interest, enabling a frank and in-depth exchange of knowledge, experience, and perspectives on a range of questions that are important to stakeholders working in or looking at getting involved in the space.

As a reminder, to participate in these activities, [join the EEA!](#) Good standards are developed through collaboration between competitive implementers and their customers to ensure that we are solving real problems. Becoming a member of the EEA would grant your organization's employees access to our collaboration site and the opportunity to join our various technical groups.

## Member News

- **Equideum Health** has announced its newest partner: SIMBA Chain. Equideum is now SIMBA Chain's lead partner for the global healthcare and life sciences industry vertical (they are a horizontal blockchain technology provider), public and private sector. [Learn more.](#)
- **SDX Digital Exchange** announces a collaboration with Fireblocks to provide institutional grade infrastructure services for regulated intermediaries and institutional investors. [Learn more.](#)

## Welcome Our Newest Members

- SDD Tech OÜ | UniCrypt Network
- DeFi Foundation
- OpenZeppelin
