That's a Wrap on Devcon 6!

The EEA team was in full force at Devcon 2022 in Bogota, Colombia. We were on hand for four great days of connecting with people and sharing the possibilities of Ethereum. As a sponsor of the event, EEA had a table where Executive Director Daniel Burnett, Technical Program Director Chaals Nevile, and Director of Sales James Harsh had a great time talking to attendees and sharing information about EEA's latest initiatives.

More than 50 EEA members attended the EEA Member Breakfast, graciously sponsored by EY, which featured presentations, great discussions, and networking. Several members, including Cartesi, Polygon, Hacken.io, Open Zeppelin, Blockdaemon, and ConsenSys, hosted cafés, workspaces.

Subscribe to our email list.
receptions, workshops, and other activities.

Dan Burnett also made two presentations, one with the Ethereum Foundation’s Dan Shaw about Ethereum Business Readiness in 2022 and one with the Ethereum Foundation’s Tas Dienes about the EEA Community Projects. The EEA also made quite an impression with a projected message about business Ethereum on the hotel building across from the conference center.

Congratulations to the Ethereum Foundation for another successful event.

---

**Our EEA Primer Library is Growing**

*Check Them Out Today*

Do you have questions about getting started on Ethereum? Our EEA Primers were created just for you. This helpful series of two-page documents offers introductory explanations of common Ethereum topics, designed specifically for those new to the space. Our primer library is growing every month, and we’re excited to share our latest additions:

- Introduction to Sidechains
- Introduction to Rollups

View the full collection [here](#).

We’re working hard to arm businesses with the information, training, and support they need to enter the Ethereum space and elevate their organizations, and this primer series is an important part of that effort.

Each primer is updated regularly to ensure information is always current, and they’re all available for public download. EEA members get the added benefit of being able to co-brand each document.

Check out the library now and stay tuned for more content coming each month!

Introducing the EEA Business Ethereum Help Desk

Interested in Ethereum for your business but don’t know where to start? Do you have questions like: what do we need to know about using Ethereum in business settings? What can we build using Ethereum?

Your wait is over. We are pleased to introduce the EEA Business Ethereum Help Desk — your go-to resource for business Ethereum.

On the EEA homepage, look for the Help Desk icon and enter your query. The EEA Business Ethereum Help Desk will provide relevant information that will help you better understand and harness the power of Ethereum. You’ll find valuable insights from introductory primers on topics like Smart Contracts, DeFi, and NFTs ...to reports, blog posts, and webinars that dive deeper into different facets of Ethereum...to connections in the ecosystem itself.

Hear from EEA Executive Dan Burnett about this exciting new business Ethereum resource!

**EEA Education Series**

**Web3 and Healthcare:**

**Where We Are and Where We’re Going**

**Wednesday, November 9, 2022, 12:30pm ET**

Join us for an in-depth look at the current state of Web3 in healthcare with Heather Flannery of Equideum. Heather is an educator and the founder of multiple innovative organizations that have brought together health and technology (blockchain in particular).

Heather will discuss current projects and initiatives, emerging technologies and protocols, and the regulatory landscape benefiting and hindering progress. She will also review the tech stack and data standards their team is using; the key stakeholders, including regulatory aspects; and how data and transactions flow within the system. She will also discuss the economic model that Web3 enables and the key drivers for adoption they are tackling.

Register in Advance

**Web3 & Blockchain World**

**November 8 & 9, 2022 — Toronto, Canada**

Subscribe to our email list.
The EEA invites you to attend the upcoming Web3 & Blockchain World. Hosted by The Blockchain Research Institute (BRI) and MCI Canada, Web3 & Blockchain World (W3B) will be held November 8-9, 2022 at the Metro Toronto Convention Centre in Toronto, Canada. Formerly known as Blockchain Revolution Global (BRG), Web3 & Blockchain World (W3B) brings together the foremost leaders, thinkers, and innovators in the Web3 and blockchain space under one global format. There will be plenty to educate, inspire, and prepare you to be part of the transformation that Web3 is bringing to business, government, and society.

Attendees will have the option to navigate between eight different thematic streams: Decentralized Finance (DeFi), Supply Chain Revolution, Web3 Platforms & DAOs, NFTs and Other Digital Assets, Environment, Social, and Governance (ESG), Digital Identity, The Metaverse & Hybrid Spaces, and Healthcare Revolution.

Interest Group & Working Group Updates

Working and Interest Group Updates

Subscribe to our email list.
Devcon, normally one of the biggest events on the Ethereum calendar, finally happened after a couple of years of delay. Many of our group participants were there. Chairs Dmytro Budorin (Hacken.io / DRAMA Working Group), Jessica Levesque (C4, Eth Training Quality Working Group), John Whelan (Santander, EEA Board), and Sonal Patel (Consensys Mesh, Eth Training Quality Working Group) were able to meet and speak to members at the EY-hosted EEA member breakfast. Antoine Toulmé (The Machine Consultancy, Testnet Working Group), Fred de Vaulx (Prometheus, Authority to Operate Working Group) and Michael Gonzales (EY, DRAMA Working Group) dialed in to update members on their respective groups.

Thanks to events hosted by members BlockDaemon, Cartesi, ConsenSys, EY, Hacken.io, OpenZeppelin, Polygon, and Quantstamp, as well as our own table in the main conference event, we had the pleasure of meeting and talking to many EEA members and people interested in our mission.

The EEA also took this opportunity to hold one session of our October Member Council meeting as a hybrid event, with people physically present in Bogotá as well as those who connected remotely.

It hasn’t just been all Devcon with the EEA. See below for exciting updates from our Working and Interest Groups!

- The rechartered Testnet Working Group is working with the EthTrust Working Group on how to make use of the EEA Testnet as the first step to testing and potentially providing certification for auditors.

- The Crosschain Interoperability Working Group is prioritizing the specification of a set of Crosschain Messaging interfaces that can be used to provide the underlying trust needed for Crosschain Function Call protocols and Crosschain Applications.

- The DeFi Interest Group continues its series of meetings on topics of interest in the space. Meanwhile, the DRAMA Working Group, which spawned from those discussions, is moving ahead with its own deliverables, adding new and existing members to the group, and preparing to release its first deliverable: an initial assessment of risks to consider as part of the due diligence prior to putting money into a DeFi protocol.

- The Eth Training Quality Working Group, with both chairs in Bogotá, is still working on a number of resources, including a resource repository that provides information on courses, training, and certification programs on Ethereum and

  Subscribe to our email list.
its current focus, and a roadmap.

- The **Authority to Operate Working Group** has faced challenges in managing multiple time zones that come with global standards work but is looking to move forward with their guidance on the most repeatable ways to establish this authorization. They'll also be considering how that is important when doing business with the US government that is based on an Ethereum Blockchain.

- With its chair, Tas Dienes (Ethereum Foundation) in Bogotá, the **Mainnet Interest Group**, has not met but will be coming back to host discussions on several topics. This will include what the merge has meant for sustainability, the EEA's recent Business Readiness Report and how real businesses are building beyond proof on the concept of Ethereum today, and other questions as people get into the newly merged Ethereum Mainnet.

- The **EthTrust Security Working Group** has come back from Bogotá happy with the reception that its recent EEA EthTrust Security Levels Specification v1 received as a key foundation to improve trust in and reliability of security testing across the ecosystem. The group also returned with some thoughts and questions on whether and whither to take the conversation further as they start the active work to develop the next version of the specification.

- At the quarterly Member Council meeting, the team considered options and relevant areas for new work as well as hearing about updates and new offers (such as the EEA primers).

Become a member and you can join an EEA Working or Interest Group to help drive these conversations and have your say about the work that the EEA and its members bring to the community. By getting involved in the conversations both in the individual groups and on the broader scale of the EEA Member Council, you have the opportunity to become part of building the best blockchain platform for Enterprise usage.
